

ASTARO SECURITY GATEWAY

Delivering powerful, easy to use,
and affordable network protection.

About Astaro

Astaro develops a complete line of network security products including the Astaro Security Gateway software and Astaro Security Gateway line of security appliances. All Astaro products offer nine critical security applications in three categories - Web Security, Email Security and Network Security - fully integrated on a single management platform.

Astaro's software has won numerous industry awards, and is protecting over 25,000 networks in 60 countries, including such organizations as Blue Cross/Blue Shield, Los Alamos National Labs, Stanford University and Watsco, Inc. Astaro products are distributed by a worldwide network of over 350 solutions partners.

Unified Threat Management

The Astaro Security Gateway, available as appliances and as software, integrates nine security

Web Security

- **Spyware/Malware Protection** blocks incoming ware, adware and other malicious applications, and prevents them from sending out confidential information.
- **Virus Protection for the Web** defends computers against virus infections from web downloads and web-based email.
- **Content Filtering** can block Internet access to 60 categories of web sites during working hours.

Email Security

- **Virus Protection for Email** catches viruses in SMTP and POP3 emails and attachments, even in compressed and archived formats.
- **Spam Protection** uses eight different techniques to filter out spam without stopping legitimate emails.
- **Phishing Protection** blocks emails from criminals trying to trick users into revealing confidential information.

Network Security

- **Intrusion Protection** detects and blocks probes and application-based attacks using heuristics, anomaly detection, and pattern-based techniques.
- **Firewall**, with stateful packet inspection and application-level proxies, guards Internet communications traffic in and out of the organization.
- **Virtual Private Network Gateway** assures secure communications with remote offices and "road warriors."
